1 Mystery Shopping

Mystery shopping has become even more popular in recent times because of the positive effects it has on businesses. A company will pay you very well to go into any of their business outlets as a mystery shopper. The aim is to ascertain the efficiency of their customer support system and to get a good feedback.

Before introducing a new product into the market, businesses will invite random people to try out these new products first to measure the extent of satisfaction with the product. They get paid to try out new product and services for free.

2 Ghostwriting

With all these websites that are being created everyday and are competing for attention. And authors that really don't have the time but want to publish more books, writing services are much needed. You can go solo or join some established ghostwriting platforms like The Content Authority, Scripted, or TextBroker.

3 Product Licensing

If you've ever heard that ideas are worthless, don't believe it. With product licensing you can sell out the rights to an idea you have to a big company and they'll pay you'll royalties for every sale they make from your idea. Sweet, huh? You just gotta start thinking of sellable ideas

4 Working on Mechanical Turk

This service is provided by Amazon to help companies' complete micro-jobs that sometimes only pay pennies for each one. Although it doesn't pay superfluously, it's often easy and fast to finish so it can be a modest side income.

Just in case you want to check out the option, I'm not sure the hourly wage might not be amazing.

I'm not sure the hourly wage will be anything amazing here but I wanted to include it as an option in case you wanted to check it out.

5 Podcasting

Find a niche you can work with and create wonderful podcasts. If they are really good, the huge traffic generated by thousands of people who listen to your podcasts will catch the attention of big advertising companies.

6 Bookkeeping / Accounting / Tax Preparation Service

You can also render some help to other businesses with their accounting and finances. If you have an accounting back from school or maybe your daily job, this should be a great option.

7 Airbnb

Do you have extra rooms in your house? If yes then you can rent it out to visitors on Aribnb.com. This is a pretty cool way to earn money and you still get to meet people from all around the world.

I got the opportunity to speak with A Hometown Hero not too long ago and she gave me some relevant information and I learnt how because this website she lives rent free. And she also travels around the world renting out her High rise Tampa Condominium.

8 Selling on eBay

eBay isn't so easy with its low-margin competitive environment but it definitely isn't packed out of opportunities. You can still earn extra cash on the world's largest marketplace.

9 Computer Repair Service

The number of computer devices, smart phones and tablets has quadrupled over the years and as such create a huge market for solo-operators. Considering the importance of these devices, the market of computer repairs cannot be sidelined, which creates more opportunity.

10 App Development

Many new companies are looking for app developers to help them create apps to further attract and engage with their customers. Already made companies as well sometimes need an upgrade or a reconstruction. And the good thing is that you get paid whether or not the app becomes a hit.

In 2014, my cousin Derrick Grace and I created; published and sold the most expensive mobile application for apparel in the entire world. It was sold for \$120 which was a very good one. And another amazing thing is you don't even have to create a high ticket mobile app. You can as well just make your full time income off downloads and activities on the app, people clicking ads. A gold mine it is!

More recently, Uber successful business man Carter Thomas broke down what he'd do if he had to start over in an interview that I found on YouTube. Full of insight!

11 Being a Task Rabbit

This means that you help out with delivery services on demand. It's running errands in your spare time completing real tasks on their platform.

One user in Seattle makes a whole lot of money; his full time living to be precise just delivering GROCERIES!

The platform also allows for virtual work like online research and other tasks that can be done remotely.

12 Affiliate Marketing

You get a commission off each sale from referring website visitors to purchase products online. Here you might not make so much money at once and as such it might not make you rich, but if you're looking for a side job that'll bring some money while you can still engage in other things then this might just work for you. And beware of slimy salespeople; don't join any affiliate marketing "program" or "system". Many of these people just want to take advantage of newbies. Be very careful.

13 Building Niche Websites

This is a very popular side hustle, mostly because they can be a great income source.

I am an expert in building niche sites but I'll just direct you to two wonderful resources, [here](#) and [here](#).

Feather Scott has really never let me down one time when I have any question relating to this and when I need her to run me through a certain process. She is a guru and my major instructor on anything Internet marketing related.

14 Hyper-Local Newspaper

There's an opportunity in your neighborhood. There's always demand for gossip and information, can you start up a local newspaper in your neighborhood? Eventually you will have to sell Ads too, can you do this?

15 Car Flipping

You have to be good with cars for this one. Car flipping entails you buying cars at very low prices and selling it high to make profit. This can really work if you can do it well and provide you some extra cash. Who knows, you might just get really lucky with the cars and find good buyers.

16 Building an Authority Website

Niche sites often get a lot of buzz but an authority site has a chance of withstanding whatever changes in Google's algorithm and making it into a long term asset. Feathers Scott is a very reliable resource on this subject of Authority websites as well.

17 Car Wash and Detailing

You can start up with a low cost mobile detailing service, yes. And you'll find a lot of clients at place where cars gather. Like the mall, always packed with cars. Schools, office parks, sporting events and other places you know as well.

18 Cleaning Service

If you don't mind this then you will definitely making money off cleaning at companies that really cannot do without this service. It may not be glamorous, but it's sure. What do you think? You could just do it part time.

19 Computer Repair Service

The number of computer devices, smart phones and tablets has quadrupled over the years and as such create a huge market for solo-operators. Considering the importance of these devices, the market of computer repairs cannot be sidelined, which creates more opportunity.

20 Alterations

If you are very good at using a sewing machine then you stand a chance of earning some money for clothing alteration. The market is quite ripe and due the lack of transparency in pricing, so many people are willing to alter some clothes so there's a good chance you'll find this resourceful. I've have some of suits altered as well from many different places and with dramatically different rates.

Free marketing tip: Consider reaching posting fliers at places where your customers will be at. Like the gym, where people have lost a lot of weight amd are willing to alter some of their clothes.

21 Cover Letter and Resume Service

Many job seekers can definitely use some help in the development of their documents, especially since they want the job and the last thing they want is to present a shabbily compiled document, risking their chances of getting picked. An experience in HR would be very useful here as well.

More interestingly, payments can be made on a pay-for-performance model; the applicant gets the interview, you get paid.

There are stories of trained regular people who carefully sought out for inefficiencies on Craigslist and other markets and connect the dots in solving them.

Drop shipping allows you to set up a storefront and process sales. Meanwhile, you don't even get to touch the actual product. Instead, the items go straight to the customer from the manufacturer or the wholesaler. You're more like a product face salesperson.

30 Child Care

Don't you think this sounds a little more professional than "babysitting"? Child care can fetch you extra cash. So many parents are busy with work and they can't afford to leave their children alone so it won't be so hard to get a child care job. So many people live off this.

Establishing a business like this is a good idea because you will be taking the burden off a large number of people who really dislike having anything to do with laundry. For a fee too, it will be very rewarding.

44 Junk Hauling Service

There is a goldmine in other peoples junk, many of the items can be resold for a fortune. If you don't want to go that far, operating a junk haulage service is a great idea for a side business.

45 Kindle Publishing

Amazon has created the largest commercial retail platform in the world. It is big enough to accommodate everyone interested in selling. There is a thriving market for eBooks on Amazon; you can get involved with this market.

I have had a great experience on Amazon. My first eBook was a success it made 1,100 sales in 2016. The revenue from it spurred me on to writing more eBooks which are also doing very well.

Not long ago, I enlisted thelaunchformula.com for \$11.95 in light of the fact that it was an infectious title for a forthcoming course I'm taping.
