

The background of the entire image is a close-up, high-contrast photograph of red mechanical components, possibly from a car engine or a piece of industrial machinery. The red is a deep, vibrant color, and the lighting creates strong highlights and shadows, emphasizing the textures and curves of the metal parts. Overlaid on this background is a large, white rectangular box that contains the main text.

PROMPT FORMULAS

Thank you for downloading!

The prompt formulas in this PDF are designed to be ideally short, simple and effective across a number of platforms.

The images you see are made in Midjourney, but there is no reason why you can't use these to format your prompts in any other AI Art platform.

You can add, subtract, or change any of these to suit yourself as they are just a guideline to not only use for quick reference, but to help you learn how to think when prompting.
