Intelligence + Insight Systems

Use these to gather market signals, monitor trends, and stay ahead of competitors — automatically.

1. Track competitor pricing changes in real-time and notify me via Slack.

Stay alert to market shifts before they undercut your offers.

2. Monitor competitor social posts and summarize key insights every morning.

See what's working for others without checking manually.

3. Scrape newly launched products from top 5 rivals and categorize by type.

4. Scrape niche Reddit forums and summarize emerging pain points.

Perfect for founders and marketers building product-market fit.

5. Summarize daily industry news and how it affects our competitors.

6. Scrape competitor job postings for strategy clues.

Hiring roles = roadmaps.

7. Monitor TikTok trends and generate angles for our brand.

Data Analysis + Reporting

Automate your dashboards, reports, and decision-making summaries.
