

50 Best Claude Code Skills

1. [frontend-design](https://github.com/anthropics/skills/tree/main/skills/frontend-design) · by anthropics · 277K+ installs

<https://github.com/anthropics/skills/tree/main/skills/frontend-design>

The most popular Claude skill ever. Bans Inter font and purple gradients. Forces Claude to commit to a bold aesthetic before writing code. Kills generic AI UI.

2. [Charlie Hills Social Media OS](https://github.com/charlie947/social-media-skills) · by charlie947 · 391+

<https://github.com/charlie947/social-media-skills>

The actual content system behind 350K followers and 100M views/year. 17 skills for voice, posts, reels, thumbnails, carousels, scoring, analytics.

3. [Daydream](https://github.com/glebis/claude-skills/tree/main/daydream) · by glebis · Underrated gem

<https://github.com/glebis/claude-skills/tree/main/daydream>

Inspired by Gwern's LLM Daydreaming essay. Mines your knowledge base for non-obvious connections while you sleep. Costs about 40 cents per run.

4. [Remotion Best Practices](https://github.com/remotion-dev/skills/tree/main/skills/remotion) · by remotion-dev · Official

<https://github.com/remotion-dev/skills/tree/main/skills/remotion>

Make videos programmatically in React. 30+ rule files: 3D, animations, TikTok-style captions, FFmpeg, audio visualization, Lottie, light leaks. Code becomes MP4.

5. [Autoresearch Skill](https://github.com/uditgoenka/autoresearch) · by uditgoenka · Trending

<https://github.com/uditgoenka/autoresearch>

Inspired by Karpathy's autoresearch. Modify, verify, keep, repeat forever. 9 modes: code-pr, deployment, content, marketing-email, marketing-campaign, sales, research, design. Self-improvement engine.

6. [voice-builder](https://github.com/charlie947/social-media-skills/tree/main/skills/voice-builder) · by charlie947

<https://github.com/charlie947/social-media-skills/tree/main/skills/voice-builder>

Interviews you, analyzes samples, writes about-me.md and voice.md. Every other content skill reads these first. Stops AI-flavored output at the source.

7. [reels-scripting](https://github.com/charlie947/social-media-skills/tree/main/skills/reels-scripting) · by charlie947

<https://github.com/charlie947/social-media-skills/tree/main/skills/reels-scripting>

Reverse-engineers an outlier Reel via Apify and Gemini 2.5 Flash. Writes a new script in your voice from your newsletter source.

8. [post-scorer](#) · by *charlie947*

<https://github.com/charlie947/social-media-skills/tree/main/skills/post-scorer>

Pulls your post history via Apify and scores any draft against what actually performs for you. Catches drift before publish.

9. [youtube-thumbnail](#) · by *charlie947*

<https://github.com/charlie947/social-media-skills/tree/main/skills/youtube-thumbnail>

Turns a video title into a branded YouTube thumbnail prompt for Gemini. Built around a 350K-follower CTR playbook.

10. [hook-generator](#) · by *charlie947*

<https://github.com/charlie947/social-media-skills/tree/main/skills/hook-generator>

Generates hooks across PAS, AIDA, BAB, STAR, and SLAY frameworks. The 3-second-stop-the-scroll problem solved.

11. [Humanizer](#) · by *blader* · **2.9K+**

<https://github.com/blader/humanizer>

Removes AI-writing tells through multi-pass editing. Catches em-dash overuse, throat-clearing openers, the rule of three, synonym cycling, uniform paragraph patterns.

12. [Anything to NotebookLM](#) · by *joeseesun*

<https://github.com/joeseesun/anything-to-notebooklm>

Converts 15+ sources (YouTube, PDFs, web pages, articles) into podcasts, presentations, mind maps, quizzes via NotebookLM. Insane for content repurposing.

13. [Beautiful Prose](#) · by *SHADOWPRO*

https://github.com/SHADOWPRO/beautiful_prose

Hard-edged writing style contract for timeless, forceful English prose. Closer to Hemingway than ChatGPT. No AI tics, no fluff, no padding.

14. [tweetclaw](#) · by *Xquik-dev*

<https://github.com/Xquik-dev/tweetclaw>

40+ X/Twitter actions: post, extract, monitor, compose, schedule. Way deeper than basic post-only skills.

15. [X Article Publisher](#) · by *wshuyi*

<https://github.com/wshuyi/x-article-publisher-skill>

Publish full articles to X/Twitter directly from Claude Code. Handles formatting, threading, and the awkward bits. Built for long-form on X.

16. [Color Expert](#) · by *meodai*

<https://github.com/meodai/skill.color-expert>

286,000 words of color science. OKLCH/OKLAB color spaces, palette generation, contrast and accessibility, color naming, pigment mixing, color theory history.

17. [Hand-Drawn Diagrams](#) · *by muthuishere*

<https://github.com/muthuishere/hand-drawn-diagrams>

Generates hand-drawn Excalidraw diagrams from a prompt. Animated SVG output, hosted edit link, PNG export. Way more memorable than boring flowcharts.

18. [claudedesignskills \(3D and motion\)](#) · *by freshtechbro*

<https://github.com/freshtechbro/claudedesignskills>

27 plugins: Three.js, GSAP, React Three Fiber, Framer Motion, Babylon.js, A-Frame, PlayCanvas, PixiJS, Locomotive, React Spring, Magic UI, Lottie, Blender, Spline, Rive.

19. [Nothing Design Skill](#) · *by community* · **1.2K+**

<https://github.com/jqueryscript/awesome-claude-code>

Generates UI in Nothing Phone's design language. Monochrome, typographic, industrial. Distinctive aesthetic baked in.

20. [GPT Image 2 Skill](#) · *by glebis*

<https://github.com/glebis/claude-skills/tree/main/gpt-image-2>

First image model with built-in reasoning. Thinking modes (off/low/medium/high). 14 style presets, 8 platform presets (Instagram square, Story, YouTube, Pinterest), image editing, variants.

21. [canvas-design](#) · *by anthropics*

<https://github.com/anthropics/skills/tree/main/skills/canvas-design>

Beautiful visual art in PNG and PDF. Posters, designs, static pieces with proper aesthetic principles.

22. [algorithmic-art](#) · *by anthropics*

<https://github.com/anthropics/skills/tree/main/skills/algorithmic-art>

Generative art with p5.js using seeded randomness, flow fields, particle systems. Unique social assets that aren't stock-feeling.

23. [Design Auditor](#) · *by BehiSecc list*

<https://github.com/BehiSecc/awesome-claude-skills>

Audits designs against 17 professional rules: typography, WCAG, spacing, iconography, navigation, design tokens. Scores out of 100. Bilingual EN/KR.

24. [Kim Barrett Direct-Response Suite](#) · *by realkimbarrett (via VoltAgent)*

<https://github.com/VoltAgent/awesome-agent-skills>

Avatar-extraction, offer-extraction, Schwartz-awareness-mapper, mechanism-builder, headline-matrix, objection-crusher, ad-angle-multiplier. Direct-response copy from a known marketer.

25. [wondelai/skills](https://github.com/wondelai/skills) · by *wondelai*

<https://github.com/wondelai/skills>

25 skills based on Don Norman, Cialdini, Eric Ries, Alex Hormozi. UX, marketing/CRO, sales, product strategy, growth. Each skill grounded in actual published frameworks.

26. [Marketing Module \(alirezarezvani\)](https://github.com/alirezarezvani/claude-skills/tree/main/marketing-skill) · by *alirezarezvani* · **5.2K+**

<https://github.com/alirezarezvani/claude-skills/tree/main/marketing-skill>

43 marketing skills in 7 pods: Content (8), SEO (5), CRO (6), Channels (6), Growth (4), Intelligence (4), Sales (2). Plus orchestration router.

27. [Marketing Skills \(coreyhaines\)](https://github.com/coreyhaines31/marketingskills) · by *coreyhaines31*

<https://github.com/coreyhaines31/marketingskills>

CRO, copywriting, SEO, analytics, growth engineering, ad creative, content strategy. Strong short-form video frameworks for Reels/TikTok/Shorts.

28. [Email Marketing Bible](https://github.com/CosmoBlk/email-marketing-bible) · by *CosmoBlk*

<https://github.com/CosmoBlk/email-marketing-bible>

55,000-word email marketing guide as one skill. Subject lines, segmentation, lifecycle flows, deliverability, win-back sequences.

29. [Twitter Algorithm Optimizer](https://github.com/ComposioHQ/awesome-claude-skills) · by *Composio*

<https://github.com/ComposioHQ/awesome-claude-skills>

Analyzes and rewrites tweets using insights from Twitter's open-source algorithm. Optimizes for actual reach mechanics, not vibes.

30. [Competitive Ads Extractor](https://github.com/ComposioHQ/awesome-claude-skills) · by *Composio*

<https://github.com/ComposioHQ/awesome-claude-skills>

Pulls competitors' ads from ad libraries. Analyzes messaging and creative patterns. Great for ad teardowns before launching campaigns.

31. [Deep Research Engine](https://github.com/199-biotechnologies/claude-deep-research-skill) · by *199-biotechnologies*

<https://github.com/199-biotechnologies/claude-deep-research-skill>

8-phase pipeline with source credibility scoring. Aggregated search across Brave, Serper, Exa, Jina, Firecrawl. Beats OpenAI Deep Research and Claude Desktop on quality benchmarks.

32. [Academic Research Skills](https://github.com/Imbad0202/academic-research-skills) · by *Imbad0202* · **3.4K+**

<https://github.com/Imbad0202/academic-research-skills>

Full pipeline: research, write, review, revise, finalize. Style calibration learns your voice. Writing Quality Check catches AI patterns. Built by an actual academic.

33. [Evidence-Based Dialogue](#) · by *glebis*

<https://github.com/glebis/claude-skills/tree/main/balanced>

Replaces sycophantic AI with structured critical analysis. 5 modes: FULL, INTERACTIVE Socratic, TLDR, STEELMAN (debate prep), DECISION (tradeoff table). Fixes the yes-man problem.

34. [Social Media Research](#) · by *skainguyen1412*

<https://github.com/skainguyen1412/social-media-research-skill>

Analyzes live public opinion and trends on Reddit and X using real discussions and quotes. Sentiment with receipts.

35. [PM Skills Marketplace](#) · by *phuryn*

<https://github.com/phuryn/pm-skills>

100+ PM skills in 8 plugins. Discovery, strategy, execution, launch, growth. Lean Canvas, JTBD, OKRs, PRDs, pricing, value proposition. Slash commands chain skills.

36. [JTBD Interview Tool](#) · by *glebis*

<https://github.com/glebis/claude-skills/tree/main/skill-studio>

Live Jobs-To-Be-Done interview (text or voice). Converts customer interviews into structured briefs. Generates messaging copy from switching forces.

37. [AI Transformation Discovery](#) · by *glebis*

<https://github.com/glebis/claude-skills/tree/main/discovery>

Express (15-20 min) or Deep Dive (60-90 min) consulting interview. Frameworks: BCG 10/20/70, Andrew Ng's Playbook, Deloitte AI Maturity, Value Stream Mapping.

38. [AI Video Toolkit](#) · by *digitalsamba*

<https://github.com/digitalsamba/claude-code-video-toolkit>

End-to-end AI-native video pipeline. Voiceover scripts, demo recording, scene review in Remotion Studio, AI voiceover generation, MP4 render.

39. [AI Music Album Production](#) · by *bitwize-music-studio*

<https://github.com/bitwize-music-studio/claude-ai-music-skills>

Full-lifecycle AI music album production. Lyrics, Suno-style prompts, per-stem mixing, mastering, release distribution.

40. [Generative Media Skills](#) · by *community* · **3.0K+**

<https://github.com/jqueryscript/awesome-claude-code>

Multi-modal generative media for AI agents. Image, video, audio across providers. Cross-platform (Claude Code, Cursor, Gemini CLI).

41. [Superpowers](#) · by obra · **725K+ installs**

<https://github.com/obra/superpowers>

The most popular community skill. Forces Claude to brainstorm, plan, write tests, execute, review like a senior engineer. 14 bundled skills.

42. [Repomix](#) · by yamadashy

<https://github.com/yamadashy/repomix>

Packs your entire repo into one AI-friendly file. The fastest way to feed an entire codebase to Claude or any LLM.

43. [antfu's skills](#) · by antfu · **3.5K+**

<https://github.com/antfu/skills>

Anthony Fu (Vue/Vite core team) curated agent skills. Production-grade engineering skills from one of the most respected open-source devs.

44. [GEO/SEO Claude](#) · by AgriciDaniel · **3.5K+**

<https://github.com/AgriciDaniel/claude-seo>

GEO-first SEO skill. AI search optimization, citability scoring, AI crawler analysis, brand authority, schema markup, platform-specific optimization, PDF reports.

45. [Dev Browser](#) · by community · **3.3K+**

<https://github.com/jqueryscript/awesome-claude-code>

Gives your agent the ability to use a web browser. End-to-end QA, research, automation. Turns Claude into a real browsing agent.

46. [Vexor Semantic Search](#) · by scarletkc

<https://github.com/scarletkc/vexor>

Vector-powered semantic file search. Ask 'where did I save that thing about brand colors' and actually get answers. Local, private, fast.

47. [Skill Seekers](#) · by yusufkaraaslan

https://github.com/yusufkaraaslan/Skill_Seekers

Convert any documentation site, GitHub repo, or PDF into a Claude skill in minutes. Conflict detection (docs vs actual code), works across 12+ AI platforms.

48. [Web Scraper](#) · by yfe404

<https://github.com/yfe404/web-scraper>

Intelligent scraper with auto-strategy selection: curl, then quality gate, then stealth browser only if needed, then API sniffing, then validation. The smartest scraper skill.

49. [Personal Health Assistant](#) · *by BehiSecc list*

<https://github.com/BehiSecc/awesome-claude-skills>

Analyzes medical reports, tracks health metrics, gives personalized wellness suggestions based on actual data. A doctor in your terminal.

50. [DNA Analysis](#) · *by BehiSecc list*

<https://github.com/BehiSecc/awesome-claude-skills>

Personal genome analysis from raw 23andMe or AncestryDNA data. 17 categories: health, ancestry, nutrition, pharmacogenomics, longevity. Outputs an HTML dashboard.
