

TROUBLESHOOTING CHEAT SHEET:

Week 1 Mission Support

Quick Fixes for Common Issues | Imaginarium Class 1

HOW TO USE THIS GUIDE

When you hit a problem:

1. **Identify the category** (MemuBot, Claude, Integration, Access, etc.)
2. **Find your symptom** in the list
3. **Try the Quick Fix first**
4. **If that doesn't work, try the Deep Fix**
5. **Still stuck? Use the Help Channel reference**

Golden Rule: Before asking for help, try the fix, screenshot the error, and document what you tried.

MEMUBOT ISSUES

Issue: Can't access MemuBot dashboard

Symptom: Login page won't load or shows error message

Quick Fix:

- Clear browser cache and cookies
- Try incognito/private browsing mode
- Switch browsers (Chrome → Firefox or vice versa)
- Check if you're using the correct login URL

Deep Fix:

- Verify your account email in confirmation email
 - Reset password using "Forgot Password" link
 - Check if your Imaginarium enrollment email matches your MemuBot signup email
 - Contact: `#tech-support` in Discord with screenshot of error
-

Issue: Telegram integration not connecting

Symptom: MemuBot can't find your Telegram or won't send messages

Quick Fix:

- Open Telegram and search for @MemuBot (verify exact bot name)
- Type `/start` to initialize the bot
- Check if you blocked the bot previously (Settings → Privacy → Blocked users)
- Make sure you're using Telegram app, not web version

Deep Fix:

- Disconnect and reconnect Telegram in MemuBot settings
- Verify phone number in Telegram matches your account

- Create a new Telegram username (Settings → Username) if you don't have one
 - Try desktop Telegram app instead of mobile
 - Contact: `#memubot-help` channel with your Telegram username
-

Issue: Automation not firing at scheduled time

Symptom: Created automation but not receiving messages

Quick Fix:

- Check if automation is toggled to "Active" (not Draft)
- Verify timezone settings in MemuBot (should be EST)
- Make sure time format is correct (12-hour vs 24-hour)
- Check if you set AM/PM correctly

Deep Fix:

- Delete automation and recreate it
 - Test with a message scheduled 2 minutes from now
 - Check MemuBot notification settings (Settings → Notifications)
 - Verify Telegram notifications are enabled on your device
 - Contact: `#memubot-help` with screenshot of automation settings
-

Issue: Can't customize automation messages

Symptom: Message templates are locked or won't save edits

Quick Fix:

- Click "Edit" button before making changes
- Scroll down to find "Save" button (sometimes hidden below fold)
- Try shorter messages (some have character limits)
- Remove special characters or emojis if error appears

Deep Fix:

- Copy message text to notepad, refresh page, paste back in
 - Check if you're using a restricted keyword (spam filters)
 - Try using plain text first, then add formatting
 - Contact: `#memubot-help` with your message text
-

CLAUDE ECOSYSTEM ISSUES

Issue: Can't access Claude Skills/Cowork/Code

Symptom: Login fails or "Access Denied" message

Quick Fix:

- Verify you're using the correct Claude product URL:
 - Claude 101: `claude.ai`
 - Claude Skills: `skills.claude.ai`
 - Claude Cowork: `cowork.claude.ai` (or `team.claude.ai`)
 - Claude Code: `code.claude.ai` (or `console.anthropic.com`)
- Check if you're logged into the right Anthropic account
- Try logging out and back in

Deep Fix:

- Check your Imaginarium Starter Pack for correct access links
 - Verify your email received Claude access confirmation
 - Some features may require Pro subscription (check Starter Pack details)
 - Try different browser (some extensions block Claude)
 - Contact: `#claude-access` with screenshot of error
-

Issue: Claude not giving quality responses

Symptom: Responses are generic, vague, or unhelpful

Quick Fix:

- Add more context to your prompt
- Be specific about what format you want (bullet points, code, step-by-step)
- Include examples of what "good output" looks like
- Ask Claude to ask YOU questions first before answering

Deep Fix:

- Use the prompt refinement pattern from Mission 2:
 1. First attempt
 2. Add context about your goal
 3. Add context about your audience
 4. Add context about constraints
 5. Show example output format
 - Start conversation with: "I need your help with [X]. Before you respond, ask me 3 clarifying questions."
 - Reference existing patterns from Pattern Library
 - Contact: `#prompt-workshop` with your prompt for feedback
-

Issue: Claude Code generated broken code

Symptom: Code has errors, won't run, or doesn't do what you asked

Quick Fix:

- Copy error message exactly and paste it back to Claude with: "I got this error: [paste]. How do I fix it?"
- Ask Claude: "Explain what this code does line by line"
- Test code in smaller pieces (comment out sections to isolate the problem)
- Check if you're missing required installations (libraries, dependencies)

Deep Fix:

- Ask Claude: "Rewrite this code with detailed comments explaining each step"
 - Specify your environment: "I'm using Python 3.11 on Mac" or "I'm on Windows with VS Code"
 - Request simpler version: "Give me the most basic version that just does [core function]"
 - Share code in `#code-help` channel - other students often spot quick fixes
 - Contact: `#claude-code-help` with:
 - What you asked Claude to build
 - The code it generated
 - The error message you're getting
 - What you've tried so far
-

Issue: Claude Cowork conversation feels stuck

Symptom: Going in circles, not getting useful insights

Quick Fix:

- Ask: "What are we missing? What haven't we considered yet?"
- Say: "Let's try a completely different approach"
- Request: "Give me 5 wildly different ideas, even if they seem unrealistic"
- Reset: "Forget what we discussed. Here's the core problem: [restate]"

Deep Fix:

- Take a 10-minute break and come back
 - Write out your clearest version of the problem
 - Ask Claude: "What questions should I be asking about this?"
 - Try voice-to-text for more natural conversation flow
 - Contact: #cowork-strategies to share your topic and get community input
-

INTEGRATION ISSUES

Issue: Can't copy Claude output to MemuBot

Symptom: Text formatting breaks, messages too long, or features don't transfer

Quick Fix:

- Copy as plain text first (paste into Notepad, then copy again)
- Remove formatting (bold, italics, bullet points) that MemuBot doesn't support
- Break long messages into multiple automations
- Remove special characters Claude used

Deep Fix:

- Ask Claude: "Rewrite this for a text-only messaging system with 500 character limit"
 - Test with a simple message first to confirm MemuBot accepts it
 - Use Claude to create a template with placeholders: "Write a message template with [PLACEHOLDER] fields"
 - Document working format as a pattern for future use
 - Contact: #integration-help if specific character/format keeps breaking
-

Issue: Tools aren't "talking to each other"

Symptom: Workflow feels manual, no real integration happening

Quick Fix:

- You're not doing it wrong - Week 1 integration IS mostly manual
- Focus on copy/paste workflows: Claude → MemuBot, MemuBot → Claude
- Use Pattern Library to document the sequence
- Think "pipeline" not "automatic connection"

Deep Fix:

- Real tool-to-tool integration (APIs, Zapier, Make) comes in Build Phase
 - For now, optimize your manual workflow:
 - Keep both tools open in side-by-side windows
 - Use keyboard shortcuts (Ctrl+C, Ctrl+V or Cmd+C, Cmd+V)
 - Create a checklist for your integration steps
 - Contact: #workflow-optimization to share your process and get efficiency tips
-

PATTERN LIBRARY ISSUES

Issue: Can't upload pattern to library

Symptom: Upload button not working or submission fails

Quick Fix:

- Check file format (should be .md, .txt, or .pdf)
- Verify file size (under 5MB)
- Make sure all required fields are filled out
- Try submitting via Discord #pattern-library channel instead

Deep Fix:

- Copy pattern text and paste directly into Discord message
- Use this format:

```
**PATTERN NAME:** [name]
**WHAT IT DOES:** [description]
**TOOLS NEEDED:** [list]
**SETUP STEPS:** [numbered list]
**EXAMPLE OUTPUT:** [sample]
```

- Tag with: #pattern-submission
 - Contact: #pattern-library and mention you're having upload issues
-

Issue: Can't find patterns others mentioned

Symptom: Pattern Library seems empty or search doesn't work

Quick Fix:

- Check if you're in the right library location (link in Starter Pack)
- Use Discord search: In #pattern-library, search for keywords
- Ask in #pattern-library: "Has anyone created a pattern for [X]?"
- Some patterns are in Google Drive - check pinned messages

Deep Fix:

- Library is community-built - if pattern doesn't exist yet, YOU create it
 - Search by tool name, mission number, or problem type
 - Check Class 1 archives for previous cohort patterns
 - Contact: #pattern-library to request specific pattern
-

ACCESS & ACCOUNT ISSUES

Issue: Don't have access to Imaginarium Discord

Symptom: Invite link expired or can't see channels

Quick Fix:

- Check email for original Discord invite
- Make sure you accepted the invite and verified your email with Discord
- Look for DM from Imaginarium bot with role assignment instructions
- Some channels only appear after you react to welcome message

Deep Fix:

- Check spam/promotions folder for Discord emails
- Make sure your Discord account isn't flagged (verify phone number if needed)

- Request new invite: Email imaginarium@ktluniversity.com with your enrollment confirmation
 - Contact: Direct message @Imaginarium-Support on Discord if you can access server but not channels
-

Issue: Starter Pack items not accessible

Symptom: Links are broken or show "Access Denied"

Quick Fix:

- Check if links were sent via email vs Discord (check both places)
- Copy link and paste into incognito browser (rules out cookie issues)
- Verify you're logged into the correct Google/Anthropic/MemuBot account
- Some links require you to request access (click "Request Access" button)

Deep Fix:

- Cross-reference: Check Starter Pack slide from Class 1 presentation for correct URLs
 - Check #announcements for updated links (sometimes they change)
 - Confirm your enrollment email matches access email
 - Contact: #access-issues with:
 - Which item you can't access
 - Screenshot of error message
 - Email address you're using
-

TIME MANAGEMENT & WORKFLOW ISSUES

Issue: Missions taking way longer than estimated time

Symptom: 20-minute mission takes 2 hours

Quick Fix:

- You're not slow - estimates are for people who've done it before
- First time through? Add 2-3x to time estimates
- Take breaks every 25 minutes (Pomodoro method)
- Skip bonus challenges if you're time-crunched

Deep Fix:

- Identify where time is going:
 - Reading instructions? Skim first, details later
 - Technical issues? Jump to troubleshooting immediately
 - Perfectionism? Ship "good enough" first, refine later
 - Distraction? Use Freedom/Forest apps to block distractions
 - Batch similar missions (do all MemuBot missions in one session)
 - Contact: #accountability to find a study partner or time-blocking group
-

Issue: Feeling overwhelmed by amount to learn

Symptom: Paralysis, procrastination, or panic about falling behind

Quick Fix:

- You don't need to master everything - just complete missions
- Focus on ONE mission at a time (close other tabs)
- Done is better than perfect

- Check Discord - you're not alone, everyone feels this

Deep Fix:

- Reframe: You're not "behind" - you're exactly where you are
- Minimum viable completion: Do core mission, skip bonus
- Use Commander's Log to process feelings (write it out)
- Ask: "What's the smallest next step I can take right now?"
- Contact: #mental-health-check-in or #accountability for support

WHEN TO ASK FOR HELP

Before posting in help channels:

- ☐ I read the relevant section of this cheat sheet
- ☐ I tried the Quick Fix
- ☐ I tried the Deep Fix
- ☐ I can describe the problem specifically
- ☐ I have a screenshot of the error/issue
- ☐ I can list what I've already tried

Post your help request using this format:

```
**MISSION:** [Which mission]
**PROBLEM:** [One sentence description]
**WHAT I TRIED:**
1. [First thing]
2. [Second thing]
3. [Third thing]
**SCREENSHOT:** [Attach image]
**ERROR MESSAGE:** [Copy exact text]
```

This gets you help 10x faster than "MemuBot isn't working."

HELP CHANNEL DIRECTORY

Issue Type	Discord Channel	Response Time
MemuBot technical	#memubot-help	1-6 hours
Claude access/login	#claude-access	1-6 hours
Claude prompting	#prompt-workshop	1-12 hours (community)
Code debugging	#code-help	1-12 hours (community)
Integration workflow	#integration-help	1-12 hours (community)
Pattern Library	#pattern-library	1-24 hours (community)
Account/access	#access-issues	6-24 hours (admin)
General questions	#tech-support	Varies
Accountability/motivation	#accountability	Immediate (peer)
Mental health check-in	#mental-health-check-in	Immediate (peer)

Office Hours: [Schedule TBD - check #announcements]

EMERGENCY CONTACTS

Critical blocker (can't proceed with program):

- Email: imaginarium@ctluniversity.com

- Discord: DM @Imaginarium-Support
- Include: "URGENT" in subject line + your enrollment name

Non-critical issues:

- Use Discord help channels (listed above)
- Post in #general if you're not sure where to ask
- Check #faq-answered for common questions

SELF-HELP RESOURCES

Video Tutorials:

- MemuBot Setup Walkthrough: [link in #resources]
- Claude Ecosystem Overview: [link in #resources]
- Pattern Library How-To: [link in #resources]

Documentation:

- MemuBot Official Docs: [link]

- Pattern Library: [link in Starter Pack]
- Student Showcase: #builder-showcase
- Past Cohort Q&As: #archive-class-1

MINDSET REFRAMES

When you're stuck, remember:

"I don't get it" → "I don't get it YET. What's one small thing I can clarify?"

"Everyone else is ahead" → "I can only see my own screen. Others are struggling too."

"This should be easy" → "This is my first time. Learning is supposed to feel hard."

"I'm wasting time" → "Troubleshooting is a skill. I'm learning to solve problems."

"I should quit" → "I should ask for help."

PROGRESS CHECK

If you're stuck for more than:

- **15 minutes:** Try Deep Fix
- **30 minutes:** Post in Discord help channel
- **1 hour:** DM a fellow student in #study-buddies
- **2 hours:** Email imaginarium@ctluniversity.com

Don't suffer in silence. We built this to support you.

 **YOU ARE OPERATIONAL. YOU ARE CAPABLE. YOU ARE SUPPORTED.**
