10 Income Streams

Open-source-to-revenue worksheet — turning self-hosted alternatives to SaaS giants into priced, sellable offerings.

SOURCE: HANDWRITTEN NOTES, JUNE 23 2026

17 TOOLS / 3 TRACKS

17

TOOLS TO PRICE

How to Use This Worksheet

- 1 Each tool gets one page. The grey box at top is the raw idea from your notes — read it first, then fill in the open fields around it.
- 2 Score each tool on **Effort to Stand Up** and **Revenue Confidence** using the dot scale — low effort + high confidence is your launch order.
- 3 Work the tools in order, or jump straight to whichever one is already half-built in your head. There's no required sequence.
- 4 Use the Priority Matrix on the last page to rank all 17 once you've filled in a first pass, then commit to your first 3.

This packet is organized into three tracks, mirroring the order of your notes:

Track I is tools that replace something in your own stack first (proof-of-concept before you sell it). Track II is dev/AI infrastructure plays — higher technical lift, higher ceiling. Track III is the direct service-resale plays — fastest path to a client check.

TRACK I — PERSONAL INFRASTRUCTURE SWAPS

- Immich, Anytype, TwentyCRM, Jellyfin, Documenso, Postiz

TRACK II — DEV & AI TOOLING PLAYS

- Cal.com, CodeGraph, MoneyPrinter Turbo, Taste-Skill, SECC, Knowledge-Work Plugins

TRACK III — OPEN-SOURCE SAAS RESALE

- Listmonk, Penpot, Coolify, AppFlowy, Medusa, n8n, Ghost, Plausible

I

Personal Infrastructure Swaps

Replace the SaaS tools you already pay for with self-hosted, sovereign versions — proof of concept on your own stack before you ever pitch a client.

```
01 / IMMICH — Google Photos replacement
02 / ANYTYPE — Notion replacement
03 / TWENTYCRM — Salesforce, open source
04 / JELLYFIN — own Netflix for your files
05 / DOCUMENSO — open-source DocuSign
06 / POSTIZ — open-source Buffer / Hootsuite
```

Immich

From the notes: Replace Google Photos.

WHAT IT REPLACES
Google Photos / iCloud Photos storage & backup

WHO'D PAY FOR THIS

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP (SERVER, STORAGE, TIME)

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Notion replacement.

WHAT IT REPLACES
Notion (docs, wikis, databases, internal ops)

WHO'D PAY FOR THIS

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Salesforce, but open source.

WHAT IT REPLACES

Salesforce / HubSpot CRM

WHO'D PAY FOR THIS

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

☐ _____

From the notes: Own Netflix for your files, legally own.

WHAT IT REPLACES
Netflix / Plex — self-hosted media server for owned files

WHO'D PAY FOR THIS

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Open-source DocuSign alternative.

WHAT IT REPLACES
DocuSign — e-signature & document execution

WHO'D PAY FOR THIS

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

Postiz

From the notes: Open-source Buffer → Hootsuite.

WHAT IT REPLACES
Buffer / Hootsuite — social media scheduling

WHO'D PAY FOR THIS
e.g. KTL+ content pillars, F.A.C.T.S. comms, client brands

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

II

Dev & AI Tooling Plays

Higher technical lift, higher ceiling — these lean on the OCP / agentic stack you've already built and turn it into licensable infrastructure or productized services.

```
07 / CAL.COM — open-source Calendly, white-label, sell to dentists/lawyers
08 / CODEGRAPH — pre-indexed code knowledge graph for AI coding agents
09 / MONEYPRINTER TURBO — one-click AI short-form video generation
10 / TASTE-SKILL — gives your AI good taste, kills AI slop
11 / SECC — agent harness performance optimization system
12 / KNOWLEDGE-WORK PLUGINS — open-source plugin repository for knowledge workers
```

From the notes: Open-source Calendly. Fork it, white-label it. Sell to dentists/lawyers for \$1,200/mo.

WHAT IT REPLACES

Calendly — scheduling & booking

TARGET CUSTOMER

Dentists, lawyers, other appointment-driven small practices

WHITE-LABEL / RESELL ANGLE

PRICING — NOTES SAY \$1,200/MO

Validate against local market rate per niche

FORK & DEPLOYMENT PLAN (HOSTING, BRANDING, ONBOARDING FLOW)

EFFORT TO LAUNCH

○○○○○

REVENUE CONFIDENCE

○○○○○

NEXT STEP

☐ _____

From the notes: Pre-indexed code knowledge graph for Claude Code, Codex, Gemini, Cursor, OpenCode, Antigravity, Kiro, Hermes Agent.

WHAT IT REPLACES

Manual codebase context-gathering for AI coding agents

TARGET CUSTOMER

Dev teams / solo builders running multiple AI coding agents

INTEGRATION TARGETS TO BUILD FOR

Claude Code · Codex · Gemini · Cursor · OpenCode · Antigravity · Kiro · Hermes Agent

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH

○○○○○

REVENUE CONFIDENCE

○○○○○

NEXT STEP

☐ _____

MoneyPrinter Turbo

From the notes: Generate short videos with one click using AI/LLM.

WHAT IT REPLACES

Manual short-form video production / editors

TARGET CUSTOMER

e.g. KTL+ content pillars, creators, agencies needing volume

PRODUCTIZE AS (TOOL LICENSE VS. CONTENT SERVICE)

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP (MODEL/API COSTS, PIPELINE)

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

☐

Taste-Skill

From the notes: Gives your AI good taste, stops AI from generating AI slop.

WHAT IT REPLACES

Manual quality/taste review on AI-generated output

TARGET CUSTOMER

Builders/agencies shipping AI-generated content or code

FORMAT (SKILL PACKAGE, SAAS LAYER, CONSULTING?)

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

From the notes: Agent harness performance optimization system — skills, instincts, memory, security, research first.

WHAT IT REPLACES
Ad-hoc agent harness tuning / manual prompt engineering

TARGET CUSTOMER
Teams running agent harnesses (OCP-style stacks, AI builders)

CORE COMPONENTS TO BUILD (SKILLS / INSTINCTS / MEMORY / SECURITY / RESEARCH)

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

Knowledge-Work Plugins

12

From the notes: Open-source repository of plugins for knowledge workers. Host code as a GitHub Action / in repo.

WHAT IT REPLACES

Fragmented one-off scripts / point tools for knowledge work

TARGET CUSTOMER

Knowledge workers, indie builders, dev teams

DISTRIBUTION PLAN

GitHub Action, code hosted directly in repo

MONETIZATION PATH (OPEN-CORE, SPONSORSHIP, PAID PLUGINS?)

FIRST 3 PLUGINS TO SHIP

EFFORT TO LAUNCH

○○○○○

REVENUE CONFIDENCE

○○○○○

NEXT STEP

☐ _____

III

Open-Source SaaS Resale

The fastest path to a client check — self-host the open-source alternative, charge a markup, manage it for them. Each one already has a clear comp in the notes.

```
13 / LISTMONK — open-source Mailchimp, resell to agencies at 10x markup
14 / PENPOT — open-source Figma, self-hosted design tools
15 / COOLIFY — open-source Vercel/Heroku, $20/mo replacing $200/mo
16 / APPFLOWY — open-source Notion for privacy-conscious enterprise
17 / MEDUSA — open-source Shopify, 5% of every sale forever
+ n8n — open-source Zapier, $500-2,000 automation setups
+ GHOST — open-source Substack, 100% margin
+ PLAUSIBLE — privacy-first analytics, resell to agencies at $50/mo
```

Listmonk

From the notes: Open-source Mailchimp. Send unlimited emails. Resell to agencies at 10x markup.

WHAT IT REPLACES
Mailchimp — email marketing & list management

TARGET CUSTOMER
Marketing agencies

THE 10X MARKUP — YOUR COST

THE 10X MARKUP — RESALE PRICE

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Open-source Figma. Self-hosted design tools.

WHAT IT REPLACES
Figma — design & prototyping

TARGET CUSTOMER

THE RESELL / MARKUP ANGLE

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Open-source Vercel and Heroku. Charge devs \$20/mo, replace \$200/mo. Manage deployments.

WHAT IT REPLACES
Vercel / Heroku — app hosting & deployment

TARGET CUSTOMER
Devs / small dev teams currently paying for hosted PaaS

PRICE POINT — NOTES SAY \$20/MO (REPLACES ~\$200/MO)

SERVICE LAYER — WHAT "MANAGE DEPLOYMENTS" MEANS IN PRACTICE

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

From the notes: Open-source Notion. Sell self-hosted to enterprise worried about data privacy.

WHAT IT REPLACES
Notion — for privacy-sensitive enterprise deployments

TARGET CUSTOMER
Enterprise clients with data-privacy/compliance concerns

THE PITCH (DATA SOVEREIGNTY ANGLE)

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

Medusa

From the notes: Open-source Shopify. Take 5% on every sale, forever.

WHAT IT REPLACES

Shopify — e-commerce platform

TARGET CUSTOMER

e.g. Kings Kounty Klothing, The Mart 125th vendors, other apparel/merch clients

THE REVENUE SHARE — 5% FOREVER

SETUP / ONBOARDING FEE (IF ANY)

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

☐

From the notes: Open-source Zapier. Sell automation services for \$500-2,000 setup.

WHAT IT REPLACES

Zapier — workflow automation

TARGET CUSTOMER

Already core to your OCP / agent stack — package outward

SETUP FEE — NOTES SAY \$500-2,000

ONGOING RETAINER (MAINTENANCE/MONITORING)?

PACKAGE THIS FROM EXISTING OCP WORKFLOWS (SCOUT CLAW, FORGE CLAW, ETC.)

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

☐

Ghost

From the notes: Open-source Substack. 100% margin.

WHAT IT REPLACES

Substack — newsletter / paid subscription publishing

TARGET CUSTOMER

Internal use (KTL+, F.A.C.T.S.) and/or resale to other creators

WHY 100% MARGIN (VS. SUBSTACK'S CUT)

PRICING MODEL

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH

REVENUE CONFIDENCE

NEXT STEP

☐

Plausible

From the notes: Privacy-first Google Analytics. Self-host it, resell to agencies at \$50/mo.

WHAT IT REPLACES
Google Analytics — privacy-first alternative

TARGET CUSTOMER
Agencies

RESALE PRICE — NOTES SAY \$50/MO

NUMBER OF CLIENTS NEEDED TO HIT TARGET INCOME

WHAT'S NEEDED TO STAND THIS UP

EFFORT TO LAUNCH
○○○○○

REVENUE CONFIDENCE
○○○○○

NEXT STEP
☐ _____

Priority Matrix — Rank Your First 3

TOOL	TRACK	EFFORT (1-5)	CONFIDENCE (1-5)	RANK	FIRST ACTION
