

# 72 KLAWS COMPLETE TOOL STACK

Quick Reference: All 72 Tools Across 4 Tiers

---

## TIER 1: SUBSTRATE FOUNDATION (18 Tools)

*The absolute base layer - nothing runs without these*

### FILES & CODE (4)

- ☐ **Filesystem MCP** - 10K+ stars | Local file operations
- ☐ **GitHub MCP** - 28.3K+ stars, 889K DL | Repository management
- ☐ **Git MCP** - Official | Version control
- ☐ **Fetch MCP** - Official | Web content retrieval

### MEMORY & THINKING (3)

- ☐ **Memory MCP** - Official | Knowledge graph persistence
- ☐ **Sequential Thinking MCP** - Official | Multi-step reasoning
- ☐ **Context7 MCP** - Community | Advanced context

### WEB SEARCH (3)

- ☐ **Brave Search MCP** - Official Brave | Independent index
- ☐ **Tavily MCP** - 1.4K stars, #1 AgentRank | AI search
- ☐ **Exa MCP** - 4K stars | Semantic neural search

### BROWSER & DATA (4)

- ☐ **Playwright MCP** - 6.1K+ searches/mo | Multi-browser automation
- ☐ **Puppeteer MCP** - Official | Chrome automation
- ☐ **PostgreSQL MCP** - Official | SQL database
- ☐ **Supabase MCP** - 2.1K+ stars | Full-stack DB

### COMMUNICATION (2)

- ☐ **Slack MCP** - Official | Team messaging
- ☐ **Notion MCP** - Official | Documentation

## MONITORING (2)

- ☐ **Sentry MCP** - Official | Error tracking
  - ☐ **Firecrawl MCP** - 98.3K+ stars | Web scraping
- 

## TIER 2: AGENTIC INFRASTRUCTURE (18 Tools)

*Agent coordination, orchestration, specialized capabilities*

### VECTOR DATABASES & RAG (4)

- ☐ **Pinecone MCP** - Official | Managed vector search
- ☐ **Qdrant MCP** - Community | Self-hosted vector DB
- ☐ **Weaviate MCP** - Community | Multi-modal embeddings
- ☐ **Chroma MCP** - Community | Local vector storage

### AUTOMATION PLATFORMS (4)

- ☐ **Zapier MCP** - Official | 8,000+ app integrations
- ☐ **n8n MCP** - Community | Self-hosted workflows
- ☐ **Pipedream MCP** - Official | Serverless automation
- ☐ **Make MCP** - Community | Visual automation

### CLOUD INFRASTRUCTURE (4)

- ☐ **AWS MCP** - AWS Labs | AWS services
- ☐ **Docker MCP** - Docker Desktop | Container management
- ☐ **Kubernetes MCP** - Community | Cluster orchestration
- ☐ **Terraform MCP** - Community | Infrastructure as code

### DATA PIPELINES (3)

- ☐ **SQLite MCP** - Official | Local databases
- ☐ **MongoDB MCP** - Community | NoSQL database
- ☐ **Redis MCP** - Community | Caching & pub/sub

### PROJECT MANAGEMENT (3)

- ☐ **Jira MCP** - Official Atlassian | Issue tracking
- ☐ **Linear MCP** - Official Linear | Project management

- ☐ **Asana MCP** - Community | Task management
- 

## TIER 3: SPECIALIZED SERVICES (18 Tools)

*Domain-specific capabilities and integrations*

### E-COMMERCE & PAYMENTS (3)

- ☐ **Shopify MCP** - Official Shopify | E-commerce platform
- ☐ **Stripe MCP** - Official Stripe | Payment processing
- ☐ **WooCommerce MCP** - Community | WordPress commerce

### CRM & SALES (3)

- ☐ **HubSpot MCP** - Official HubSpot | CRM platform
- ☐ **Salesforce MCP** - Community | Enterprise CRM
- ☐ **Pipedrive MCP** - Community | Sales pipeline

### WEB SCRAPING & DATA (3)

- ☐ **Apify MCP** - Official Apify | 3,000+ scrapers
- ☐ **Octoparse MCP** - Community | Visual scraping
- ☐ **ScraperAPI MCP** - Community | Proxy & scraping

### GOOGLE SERVICES (3)

- ☐ **Google Drive MCP** - Official Google | File storage
- ☐ **Google Calendar MCP** - Official Google | Scheduling
- ☐ **Gmail MCP** - Official Google | Email

### CLOUD PROVIDERS (3)

- ☐ **Azure MCP** - Microsoft | Azure services
- ☐ **GCP MCP** - Google Cloud | GCP services
- ☐ **DigitalOcean MCP** - Community | Cloud hosting

### ANALYTICS & BI (3)

- ☐ **Snowflake MCP** - Community | Data warehouse
- ☐ **Databricks MCP** - Community | Data analytics
- ☐ **Tableau MCP** - Community | Business intelligence

---

## TIER 4: ADVANCED INTEGRATION (18 Tools)

*Orchestration, custom integrations, meta-tools*

### DEVOPS & CI/CD (4)

- ☐ **GitLab MCP** - Community | Code & CI/CD
- ☐ **CircleCI MCP** - Community | Continuous integration
- ☐ **Jenkins MCP** - Community | Automation server
- ☐ **ArgoCD MCP** - Community | GitOps deployments

### OBSERVABILITY STACK (3)

- ☐ **Datadog MCP** - Community | Full-stack monitoring
- ☐ **New Relic MCP** - Community | APM & observability
- ☐ **Grafana MCP** - Community | Metrics visualization

### MESSAGE QUEUES & STREAMING (3)

- ☐ **Kafka MCP** - Community | Event streaming
- ☐ **RabbitMQ MCP** - Community | Message broker
- ☐ **Pulsar MCP** - Community | Distributed messaging

### API MANAGEMENT (3)

- ☐ **Kong MCP** - Community | API gateway
- ☐ **Apigee MCP** - Community | API management
- ☐ **Postman MCP** - Community | API development

### AUTHENTICATION & SECURITY (3)

- ☐ **Auth0 MCP** - Community | Authentication platform
- ☐ **Okta MCP** - Community | Identity management
- ☐ **1Password MCP** - Community | Secrets management

### META-ORCHESTRATION (2)

- ☐ **McPorter MCP** - Community | Multi-server management
- ☐ **Everything MCP** - Official | Reference/test server

---

## TOTAL: 72 TOOLS ✓

- TIER 1: 18 tools (Substrate Foundation)
  - TIER 2: 18 tools (Agentic Infrastructure)
  - TIER 3: 18 tools (Specialized Services)
  - TIER 4: 18 tools (Advanced Integration)
- 

## INSTALLATION PHASES

### PHASE 1: WEEK 1 (Core 6)

Filesystem, GitHub, Memory, Brave Search, PostgreSQL, Slack

### PHASE 2: WEEK 2 (Expanded 6)

Git, Fetch, Sequential Thinking, Tavily, Playwright, Supabase

### PHASE 3: WEEK 3 (Complete Tier 1)

Context7, Exa, Puppeteer, Notion, Sentry, Firecrawl

### PHASE 4: 72-HOUR BOOTCAMP

- Day 1: Tier 1 mastery (all 18 substrate tools)
  - Day 2: Tier 2 deployment (vectors, automation, cloud)
  - Day 3: Tier 3-4 activation (platforms + sovereignty)
- 

## WHERE YOUR CUSTOM TOOLS FIT

### YOUR CURRENT "TIER 1" → ACTUAL TIER 3

| Your Tool    | Actual Tier | Category             |
|--------------|-------------|----------------------|
| NotebookLM   | TIER 3      | AI Research Platform |
| Claude Suite | TIER 3      | LLM Access Layer     |

| Your Tool       | Actual Tier | Category             |
|-----------------|-------------|----------------------|
| Hermes Agent    | TIER 3      | Custom Agent         |
| Space Agent     | TIER 3      | Custom Agent         |
| Kimi 2.6        | TIER 3      | Custom Agent         |
| Kimi Claw       | TIER 3      | Custom Agent         |
| 100 Agent Swarm | TIER 3      | Custom Agent         |
| Manus Claw      | TIER 3      | Custom Agent         |
| GitHub ✓        | TIER 1 ✓    | <b>SUBSTRATE</b>     |
| HuggingFace     | TIER 3      | Model Registry       |
| Open Router     | TIER 3      | LLM Routing          |
| Atlas Cloud     | TIER 4      | Cloud Integration    |
| Imagen 2        | TIER 3      | Image Generation     |
| MYTHOS          | TIER 3      | Custom Platform      |
| Anti Gravity    | TIER 3      | Custom Platform      |
| GenSpark Claw   | TIER 3      | Custom Platform      |
| Obsidian        | TIER 3      | Knowledge Management |
| OPEN KLAU       | TIER 4      | <b>SOVEREIGNTY</b>   |

---

# BOOTCAMP LEARNING PATH

## DAY 1: FOUNDATION

- Morning:** Files & Code (Filesystem, GitHub, Git, Fetch)  
**Afternoon:** Memory & Search (Memory, Sequential, Brave, Tavily)  
**Evening:** Data & Monitoring (PostgreSQL, Supabase, Sentry)

## DAY 2: AGENTIC

**Morning:** Vector DBs (Pinecone, Qdrant, Weaviate, Chroma)

**Afternoon:** Automation (Zapier, n8n, Pipedream)

**Evening:** Cloud (AWS, Docker, Kubernetes)

## DAY 3: SOVEREIGNTY

**Morning:** Tier 3 platforms (introduce your custom tools)

**Afternoon:** Tier 4 integration (OPEN KLAU Protocol)

**Evening:** Noble activation (72 TOKENS, chapter launch)

---

## 5 PILLARS MAPPED TO TIERS

### K - KINETIC KNOWLEDGE

- TIER 1: Memory, Sequential Thinking, Context7
- TIER 2: Vector DBs (Pinecone, Qdrant, Weaviate, Chroma)

### L - LAND & LEGACY

- TIER 1: Filesystem, GitHub, Git, Fetch
- TIER 2: Cloud infrastructure (AWS, Docker, Kubernetes)

### A - AGI / AUTONOMY

- TIER 1: Web Search (Brave, Tavily, Exa)
- TIER 2: Automation (Zapier, n8n, Pipedream)

### W - WEALTH & WISDOM

- TIER 3: E-commerce & Payments (Shopify, Stripe)
- TIER 3: CRM & Sales (HubSpot, Salesforce)

### S - SOVEREIGNTY & SPIRITUALITY

- TIER 4: Authentication & Security (Auth0, Okta, 1Password)
  - TIER 4: Meta-Orchestration (OPEN KLAU Protocol)
-

# REVENUE STREAMS PER TIER

## **TIER 1 (Substrate):**

- Foundation licensing model
- MCP ecosystem alignment
- Universal compatibility value

## **TIER 2 (Agentic):**

- Agent orchestration services
- Vector DB consulting
- Cloud infrastructure setup

## **TIER 3 (Platforms):**

- Custom agent deployment
- Platform integration services
- Proprietary tool licensing

## **TIER 4 (Integration):**

- OPEN KLAU Protocol licensing
- Sovereignty consulting
- Chapter replication model

---

**THE SUBSTRATE IS UNIVERSAL.  
THE AGENTS ARE POWERFUL.  
THE PLATFORMS ARE CUSTOM.  
THE SOVEREIGNTY IS ABSOLUTE.**

---

**72 TOOLS. 4 TIERS. 1 ARCHITECTURE.**
