

IMAGINARIUM CLASS 2 - BUILD PHASE MISSION PLAN V2.0

KTL UNIVERSITY

/ EXECUTOR

KIMI CLAW /

IMAGINARIUM CLASS 2

BUILD PHASE // DUAL AGENT EDITION

KTL UNIVERSITY × NETERVERSE

01 // ⚡ MISSION BRIEF

"STOP JUST LEARNING. START MAKING. TONIGHT WE BUILD YOUR FIRST AI HELPER TOGETHER."

Class 2 is the **activation sequence** – the moment the cohort crosses from *knowledge* into *execution*. Every builder leaves with a working AI tool. No exceptions. Done is better than perfect. Small build, BIG momentum.

THE 3 LAWS OF BUILD PHASE

- **Safe Space:** Mistakes are expected. We learn by doing, together.
- **Step-by-Step:** We walk the path slowly. No one gets left behind.
- **Zero Jargon:** Plain English only. If we use a tech term, we explain it.

02 // PRE-ENTRY CHECKLIST

Before anyone enters Class 2, they must have completed the **Ignition Phase prerequisites** from Class 1:

CHECK	TASK	STATUS REQUIRED
	Manus AI or Kimi Claw installed & configured	ONLINE
	First automation running → posted to LiveLog	ACTIVE
	1 new pattern added (Content or Ops)	MOUNTED
	3 humans invited to Telegram channel	VERIFIED
	'Initiate' Badge earned on Leaderboard	EARNED

No evidence = no entry. Consistency is the first filter. This is not school – it's an accelerator.

03 // TRAJECTORY CONTEXT

Class 2 sits squarely in the BUILD phase. The work here is *hands-on*, not conceptual. Every minute of the session should produce something deployable.

04 // SESSION OBJECTIVES (5 EASY WINS)

These are the **mandatory exits** for Class 2. Every participant checks off all 5:

- ☐ **01 – CREATE CLAUDE ACCOUNT**
Free setup, 2 minutes max
- ☐ **02 – SAY HELLO TO CLAUDE**
First AI conversation live
- ☐ **03 – DEPLOY KIMI CLAW**
Browser agent, 5 min, no VPS needed
- ☐ **04 – RUN FIRST SKILL (ClawHub)**
Pick 1 skill from library, fire it
- ☐ **05 – SHARE WIN IN DISCORD**
Post to #wins, show your agent running

05 // THE NEW DUAL-AGENT STACK

MemuBot has been decommissioned. The Imaginarium infrastructure has been upgraded to a **Dual-Agent Stack** – two specialized autonomous systems operating in coordinated roles.

FEATURE	OLD STACK (RETIRED)	NEW STACK (ACTIVE)
Agent	MemuBot	Manus AI + Kimi Claw
Architecture	Single-proactive-bot	Dual-agent orchestration

FEATURE	OLD STACK (RETIRED)	NEW STACK (ACTIVE)
Intelligence	MemuDot built in	Manus (multi-agent) + Kimi K2.5 (Agent Swarm)
Setup	Telegram + VPS + config	Cloud-native, browser-first, no VPS
Skill Library	Pattern Library (manual)	ClawHub (5,000+ skills) + Manus Skills
Autonomy	Reactive + scheduled	Fully autonomous, self-directing, swarm-capable
Memory	Session-based	Persistent cross-session + 40GB cloud storage

06 // AGENT PROFILES

AGENT 01: MANUS AI

THE EXECUTOR // BUSINESS AUTOMATION ENGINE

"It doesn't answer questions. It delivers results."

Role: General-purpose autonomous AI agent in cloud VM

Core Capabilities:

-  **Browser Control** – Sees screen, navigates web, operates apps
-  **Multi-step Execution** – Research → analyze → build → deliver
-  **Connectors** – Plug into Gmail, Notion, Slack, etc.
-  **Manus Skills** – Modular expertise packs
-  **Asynchronous** – Runs in background, no babysitting
-  **Full Deliverables** – Docs, slides, spreadsheets, reports, code

Best For: B2B research, content production, lead gen, financial analysis, business automation

Setup: Under 15 minutes | **Access:** manus.im

AGENT 02: KIMI CLAW

THE OPERATOR // BROWSER-NATIVE AUTONOMOUS AGENT

"OpenClaw in your browser. No VPS. No terminal. No excuses."

Role: OpenClaw powered by Kimi K2.5 running 24/7 in browser

Core Capabilities:

-  **Browser-native** – Zero VPS, zero local setup
-  **Scheduled Tasks** – Morning briefings, email monitoring
-  **ClawHub Library** – 5,000+ community skills
-  **Persistent Memory** – Remembers context across sessions
-  **40GB Cloud Storage** – Stores files, outputs, logs
-  **Agent Swarm Mode** – Coordinates 100 parallel agents

Best For: Scheduled daily ops, passive monitoring, 24/7 community engagement, research collection

Setup: Under 5 minutes | **Access:** kimi.com | **Plan:** Kimi Allegretto (~\$39/mo)

07 // HOW THE DUAL STACK WORKS TOGETHER

IMAGINARIUM AGENT STACK v2.0

MANUS AI (Executor)

- • Complex tasks
- • Business ops
- • Research + docs

KIMI CLAW (Operator)

- • Scheduled daily tasks
- • Passive monitoring
- • 24/7 autonomous runs

■ • Multi-app flows

■ • ClawHub skills

CLAUDE (Intelligence Layer)
Elevates quality. Reasons. Creates.

PATTERN LIBRARY (The DNA)
Prompts + Workflows + Skills – the shared brain

08 // BUILD PHASE MILESTONES

NODE	MILESTONE	AGENT	STATUS
01	Setup – Account + Kimi Claw deploy	Kimi Claw	TONIGHT
02	Auth – API Keys, Security, Storage	Both	TONIGHT
03	Messages – Claude conversation + prompts	Claude	TONIGHT
04	Streaming – Real-time responses	Claude + Kimi	NEXT SESSION
05	Pattern – ClawHub skills + Prompt Eng	Kimi + Claude	NEXT SESSION
06	Orchestrate – Manus multi-step flows	Manus	CLASS 3+
07	Deploy – Manus Connectors + integrations	Manus	LOCKED
08	Demo – Ship It & Show It	Full Stack	LOCKED

09 // SESSION ARCHITECTURE (6 PHASES)

PHASE 1 — GATEWAY & ORIENTATION (SLIDES 1-5)

Objective: Set psychological safety. Remove friction. Orient to journey.

- Open with **Beginner Mode Active** – zero jargon, zero judgment
- Declare the 3 Laws: **Safe Space / Step-by-Step / Zero Jargon**
- Confirm: Tonight = BUILD. Hands on tools. Done > Perfect.

PHASE 2 — TOOL ONBOARDING (SLIDES 6-11)

Objective: Get every builder into Claude Web + deploy Kimi Claw.

Steps: Visit claude.ai → Sign up → Verify email → Security brief → Pick workspace stack.

Security Rules: API keys = credit cards. Password manager mandatory.

PHASE 3 — FIRST CONTACT (SLIDES 12-14)

Objective: Run the Hello World sequence. Get every builder talking to Claude live.

Demo Prompt:

```
"Hi Claude, I'm new to AI. Can you help me write a 2-sentence bio for my LinkedIn? Keep it friendly but professional."
```

4 Starter Patterns:

- P01: Friendly Bio Writer (Personal Branding)
- P02: Daily Affirmation (Wellness/Mindset)
- P03: Research Summary (Productivity)
- P04: Email Draft Helper (Communication)

PHASE 4 — MISSION SELECTION & EXECUTION (SLIDES 15-22)

Objective: Every builder picks ONE mini-mission and ships it LIVE during the session.

Distinction: Chatbot (Claude) is reactive. Agent (Kimi/Manus) is proactive and autonomous.

PHASE 5 — TROUBLESHOOTING GRID (SLIDE 23)

Objective: Normalize debugging. Problems are part of building.

- Stuck/Frozen → Hit refresh or "Retry"
- Wrong Length → Be specific: "Give me exactly 50 words"
- Wrong Tone → Provide 2 examples of your style
- Totally Lost → Post in #help channel

PHASE 6 — WIN CEREMONY & BADGE (SLIDES 24-25)

Objective: Close the loop. Anchor the win.

- Share what you built
- Drop one key takeaway
- Post to #wins → Builder Badge UNLOCKED

10 // THE THREE MISSIONS

MISSION 01 — DAILY AFFIRMATION BOT

Agent: **Kimi Claw**

Setup: **2 min**

Code: **Zero**

Steps:

1. Go to kimi.com → Enable Kimi Claw (one click)
2. Open ClawHub → Search "Daily Affirmation" skill
3. Install skill → Fill [NAME] + [MOOD] variables
4. Set schedule: "Every morning at 8AM" → Activate
5. Kimi Claw runs automatically. Wake up to your affirmation.
6. Post screenshot to Discord #wins

MISSION 02 — RESEARCH HELPER

Agent: **Manus AI**

Setup: **5 min**

Code: **Zero**

Steps:

1. Go to manus.im → Create account
2. New task → Paste 3-5 URLs
3. Command: "Summarize these into 5 bullets + key takeaway + source list. Format as a clean report."
4. Manus reads, reasons, delivers formatted doc
5. Save to Notion / Google Docs → Post to Discord #wins

MISSION 03 — EMAIL DRAFT ASSISTANT

Agent: **Manus AI**

Setup: **3 min**

Code: **Zero**

Steps:

1. Manus → Click Connectors → Link Gmail
2. New task: "Draft polite, professional reply. Tone: [friendly/firm/brief]. Intent: [what you want to say]."
3. Paste email OR let Manus read from Gmail
4. Review draft → Edit → Send
5. Post to Discord #wins

11 // TROUBLESHOOTING GRID

GLITCH	THE FIX
Stuck / Frozen	Hit refresh or click "Retry" – happens to everyone
Wrong Length	Be specific: "Give me exactly 50 words" / "3 paragraphs"
Wrong Tone	Provide 2 examples: "Here's how I write, copy this style..."
Bad Links	Paste clean URL directly, or copy-paste the article text instead
Totally Lost	Post in #help channel – the squad has your back

12 // SECURITY BRIEF

MANUS AI PROTOCOLS

- API key / account = digital vault. Never share.
- Connector permissions = grant only what's needed.

- Review agent actions before full autonomy mode.

KIMI CLAW PROTOCOLS

- K2.5 model has system-level access – review skill permissions.
- Use in private test channel before live deploy.
- Never install unverified ClawHub community skills without checking source.
- Kimi \$39/mo plan required for Claw features.

GLOBAL RULE: Store credentials in 1Password / Bitwarden. Never screenshot API tokens. If compromised → revoke immediately.

13 // WIN CEREMONY & BADGE

Post-Mission Protocol:

1. Share what you built (Affirmation / Research / Email)
2. Drop one key takeaway in Discord (even if it was hard)
3. Name who it helps (yourself / your team / your family)

BUILDER BADGE UNLOCKED

"You've officially crossed the threshold from consumer to creator."

SMALL BUILD. BIG MOMENTUM.

14 // CLASS 3 PREVIEW — LAUNCH PHASE

"NEXT: CLASS 3 (LAUNCH BASICS) — WHERE YOU'LL SHOW YOUR MINI-TOOL TO THE WORLD."

Builders who complete Class 2 should arrive at Class 3 with:

- ☐ Their chosen mini-tool tested and working
- ☐ 1 screenshot of their agent output saved + documented
- ☐ Affirmation / Research / Email tool running at least once daily
- ☐ Pattern added to their personal Cookbook in Notion

15 // FACILITATOR TIMING GUIDE

SEGMENT	TIME BLOCK	DURATION
Opening + Gateway	8:00 PM	10 min
Trajectory Context	8:10 PM	5 min
Claude + Kimi Onboarding	8:15 PM	20 min
Hello World + Patterns	8:35 PM	20 min
Mission Selection	8:55 PM	5 min
LIVE BUILD (All 3 Missions)	9:00 PM	45 min
Troubleshooting	9:45 PM	10 min

SEGMENT	TIME BLOCK	DURATION
Win Ceremony	9:55 PM	10 min
Class 3 Preview	10:05 PM	5 min

16 //

DOCTRINE SUMMARY

CLASS 2 LAW:

Done > Perfect
Chatting → Architecting
Consumer → Creator
Learning → Shipping

Kimi Claw runs the ops.
Manus executes the missions.
Claude elevates the intelligence.
The Pattern Library is the DNA.
Together – they're a full civilization.

BUILD. SHIP. OWN.
