

IMAGINARIUM CLASS 3 — LAUNCH PHASE MISSION PLAN V1.0

BUILD PHASE → LAUNCH PHASE → OWN PHASE | KTL University ×
NETERVERSE

:: CLASS 3: LAUNCH PHASE | DAYS 51-75 | STATUS: MISSION ACTIVE ::

MISSION BRIEF

"Stop building in private. Start shipping in public. Tonight you show your creation to the world – and the world shows you what's next."

01 // PRE-ENTRY CHECKLIST (CLASS 2 CARRY-OVER)

⚠ CRITICAL PROTOCOL: No shipped tool = no entry. This phase requires proof of work from the BUILD phase.

REQUIREMENT	STATUS
At least ONE mini-tool completed (Affirmation/Research/Email)	☐ REQUIRED
Kimi Claw deployed and running (at least 1 scheduled task active)	☐ REQUIRED
OR Manus AI task completed with deliverable saved	☐ ALTERNATIVE
Pattern saved to personal library (Notion/Docs)	☐ REQUIRED
Builder Badge earned from Class 2	☐ VERIFIED
Win posted to Discord #wins	☐ VERIFIED

02 // TRAJECTORY CONTEXT

[LEARN ] → [BUILD ] → [LAUNCH ← WE ARE HERE] → [OWN]
Days 1-20 Days 21-50 Days 51-75 Days 76-90+ Foundation
First Tools Public Shipping Ownership

Class 3 sits in the LAUNCH phase. You've built in private. Now you build in public.

03 // SESSION OBJECTIVES (5 LAUNCH

WINS)

- 01 – DEMO YOUR TOOL → Present to community live (3-min demo)
- 02 – GET REAL FEEDBACK → 3 humans use/test your tool
- 03 – CREATE LAUNCH ASSETS → Landing page OR demo video OR pitch doc
- 04 – AUTOMATE LAUNCH → Kimi Claw schedules announcements
- 05 – DOCUMENT THE WIN → Capstone post with results + learnings

04 // THE DUAL-AGENT STACK IN LAUNCH MODE

AGENT	BUILD PHASE (Class 2)	LAUNCH PHASE (Class 3)
Kimi Claw	Running first scheduled tasks	Automating launch announcements, monitoring feedback
Manus AI	Completing first automation	Building landing pages, creating pitch decks
Claude	First conversations	Crafting narratives, refining messaging
Pattern Library	Saving first patterns	Deploying launch templates

05 // WHAT IS "LAUNCH" IN THE IMAGINARIUM?

THE PHILOSOPHY

- Not perfection – **ITERATION**
- Not silence – **SIGNAL**
- Not hiding – **SHOWING**
- Public shipping = **ACCELERATED LEARNING**
- Feedback loop = **PRODUCT EVOLUTION**

"A launched product with flaws teaches more than a perfect product that never ships."

06 // THE LAUNCH PROTOCOL (4 STAGES)

> SYSTEM_TERMINAL

```
STAGE 01: PREPARE → Package your tool for presentation
STAGE 02: PRESENT → Demo to community (3-min live or
                    recorded)
STAGE 03: DISTRIBUTE → Get it in front of 3+ real
                    users
STAGE 04: DOCUMENT → Capture learnings and
                    iterate
```

07 // BUILD PHASE MILESTONES (UPDATED STATUS)

NODE	MILESTONE	STATUS
01	Setup	 COMPLETE
02	Auth	 COMPLETE
03	Messages	 COMPLETE
04	Streaming	 TONIGHT
05	Pattern	 TONIGHT
06	Orchestrate	 TONIGHT
07	Deploy	 CLASS 4
08	Demo	 CLASS 4

08 // SESSION ARCHITECTURE (6 PHASES)

PHASE 1 — ORIENTATION & SHOWCASE (20 MIN)

- Review trajectory
- Show exemplar launches from previous cohorts
- Set expectations: "Demos are raw. That's the point."

PHASE 2 — LAUNCH ASSET CREATION (45 MIN)

Choose ONE path:

- **Path A:** Simple landing page (via **Manus AI**)
- **Path B:** Demo video script (via **Claude** + recording)
- **Path C:** Pitch document (via **Manus AI**)

PHASE 3 — LIVE DEMOS (45 MIN)

- 3-minute demo format per builder
- What it does / How it works / What you learned
- Q&A + feedback from community

PHASE 4 — AUTOMATION SETUP (20 MIN)

- **Kimi Claw:** Schedule launch posts
- **Manus AI:** Create follow-up sequences

PHASE 5 — BETA TESTING ASSIGNMENT (15 MIN)

- Get 3 humans to use your tool
- Document their feedback
- Report back in Discord #launches

PHASE 6 — CAPSTONE BRIEF (15 MIN)

- Introduce final capstone demo (Class 4 preview)

- Assignment: Iterate based on feedback

09 // THE THREE LAUNCH MISSIONS (CHOOSE YOUR PATH)

MISSION 01 — THE DEMO VIDEO

SETUP: 30
MIN

Agent: Claude + Recording Tool

Output: 2-3 minute screen recording with voiceover

- **01** Use Claude to write demo script (problem → solution → how it works)
- **02** Record screen showing your tool in action (Loom/OBS/native)
- **03** Add simple voiceover explaining each step
- **04** Upload to YouTube/Vimeo → Post link in Discord #launches
- **05** Get 3 people to watch and give feedback

MISSION 02 — THE LANDING PAGE

SETUP: 45
MIN

Agent: **Manus AI**

Output: Simple one-page website

- **01** Open Manus AI → New task
- **02** Command: "Build a simple landing page for my [tool name]. It should explain: what it does, how to use it, and have a CTA to try it. Use HTML/CSS. Make it clean and minimal."
- **03** Manus generates the page
- **04** Deploy to Netlify/Vercel (or save as HTML file and share link)
- **05** Post link in Discord #launches
- **06** Get 3 people to visit and give feedback

MISSION 03 — THE PITCH DOCUMENT

SETUP: 30
MIN

Agent: **Manus AI** + **Claude**

Output: 1-page pitch doc (PDF or Google Doc)

- **01** Use Claude to outline pitch structure: Problem statement, Your solution (the tool), How it works, Results so far, Next steps
- **02** Use Manus AI to format and design the doc
- **03** Export as PDF or shareable link
- **04** Post in Discord #launches
- **05** Get 3 people to read and give feedback

10 // KIMI CLAW LAUNCH AUTOMATION

> SYSTEM_TERMINAL

SETUP (5 MINUTES): 01 → Open Kimi Claw in browser 02 → Create new scheduled task: "Daily Launch Announcement" 03 → Set schedule: "Every day at 9 AM for next 7 days" 04 → Command: "Post an update about my [tool] in Discord #launches channel. Rotate between: progress update / user feedback / learning / next feature." 05 → Activate → Kimi Claw posts automatically

11 // TROUBLESHOOTING GRID

GLITCH	FIX
No one responds to demo	Post in #help, ask for 3 volunteers directly, offer value exchange
Technical issues during live demo	Have backup recording ready, embrace the chaos, show troubleshooting
Landing page won't deploy	Share HTML file directly, use GitHub Pages (free), or post screenshots
Feedback is harsh/critical	This is gold. Document it. Iterate. Thank them.
Can't get 3 beta testers	Start with POD members, offer reciprocal testing, post in #beta-testing

12 // SECURITY & ETHICS BRIEF

LAUNCHING PUBLICLY:

- ⚠ Don't expose API keys in demos or code
- ⚠ Don't share personal data from beta testers without permission
- ⚠ Watermark/brand your work (prevent theft)
- ✅ Include disclaimers if tool is experimental/beta
- ✅ Credit open-source tools/libraries you used
- ✅ Be transparent about limitations

13 // WIN CEREMONY & LAUNCHER BADGE

LAUNCHER BADGE UNLOCK CRITERIA

- ✅ Tool demoed publicly (live or recorded)
- ✅ Launch asset created (landing page/video/pitch doc)
- ✅ 3+ real users tested the tool

✓ Feedback documented in #launches

✓ **Kimi Claw** automation active

"You didn't just build. You shipped. That's the difference between a student and a founder."

14 // CLASS 4 PREVIEW — OWN PHASE

Next: Class 4 (OWN Phase) – where you don't just launch products, you own assets. We're talking equity, revenue share, IP ownership, and turning your tools into income streams.

PRE-CLASS 4 REQUIREMENTS:

- ☐ Tool launched and live
- ☐ At least 5 real users (3 from Class 3 + 2 more)
- ☐ Iteration #2 completed based on feedback
- ☐ Revenue/ownership plan drafted
- ☐ Capstone demo prepared (5-min final presentation)

15 // FACILITATOR TIMING GUIDE

SEGMENT	TIME BLOCK	DURATION
Opening + Trajectory Review	8:00 PM	10 min
Showcase Exemplars	8:10 PM	10 min

SEGMENT	TIME BLOCK	DURATION
Launch Asset Creation (Guided)	8:20 PM	45 min
BREAK	9:05 PM	5 min
Live Demos (3 min each, 15 builders)	9:10 PM	45 min
Automation Setup (Kimi Claw)	9:55 PM	20 min
Beta Testing Assignment	10:15 PM	15 min
Capstone Brief + Dismissal	10:30 PM	10 min

THE DOCTRINE

> SYSTEM_TERMINAL

CLASS 3 LAW: Built → Launched Private → Public
Perfect → Iterated Consumer → Creator → LAUNCHER LAUNCH.
ITERATE.
